

Aluminum Bars from Corey

Corey has been in the aluminum distribution business for over 80 years. Today you will find an extensive range of sizes and grades in both hard and soft alloy bar, rod and wire products. We also stock selected sizes and grades of aluminum pipe, tube and extruded hollows.

Corey also manages a sizable inventory of custom extruded profiles and other special shapes for customers who wish to machine their part from a semi finished product rather than a solid bar. These custom shapes are produced by our aluminum suppliers on dies produced to the specifications provided by the customer. Minimum quantities are usually required by the aluminum supplier and Corey arranges with the customer an adequate inventory level to maintain on our premises to support the customer's demand.

ALUMINUM BAR SIZES

COLD FINISHED ALUMINUM

GRADE	ROUNDS	HEXAGONS
2011 - T3	1/8" - 3 1/4"	1/4" - 2 1/2"
