**Corey Steel Corporation  
California Proposition 65 Warning Letter**

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause [cancer](#), birth defects or other [reproductive harm](#). These chemicals can be in the products that Californians purchase, in their homes or workplaces, or that are released into the environment. By requiring that this information be provided, Proposition 65 enables Californians to make informed decisions about their exposures to these chemicals.

The raw materials that Corey Steel uses to manufacture its products can contain nickel, bismuth, and/or lead, either from intentionally adding or as a residual or tramp byproducts, which are listed under Proposition 65 by California as chemicals (metals) known to the state to cause cancer or reproductive toxicity. Other metallic compounds such as antimony, arsenic, and cadmium can also be present in trace amounts as residual or tramp byproducts of the steel making process. Corey Steel does not add any of these substances to its products through its manufacturing processes.

For further information regarding our products, please refer to the Material Safety data Sheet for the applicable product.

Thank you for your continued support.
